PREFABRICATED

READY TO INSTALL

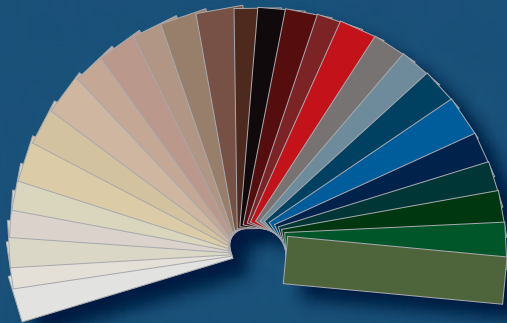

**NEW
CONCEPT
LOUVERS**

THE LEADER IN MAINTENANCE-FREE CUPOLAS

A New Concept in Maintenance-free Cupolas

Never Need Painting | Easy to Install | Over 400 Colors to Choose From

Nothing can compare
with the quality and
convenience of a made-to-order
prefabricated cupola from
New Concept Louvers.
Choose from our 78 standard
models, or let us build a
custom cupola to your exact
specifications!

Choose from over 400 colors
of aluminum!

Elegant and Functional

- ▶ Cut cooling costs in summer.
- ▶ Reduce moisture buildup in winter.
- ▶ Extend the life of your roof.
- ▶ Add a touch of class.

Low Maintenance

- ▶ Made with PVC-coated aluminum (standard)
- ▶ Copper-clad roof (standard)
- ▶ Never need painting

Easy to Install

- ▶ Shipped complete with weather vane mount and cutout for roof pitch
- ▶ Three-part design makes hoisting and assembly a snap.
- ▶ Preinstalled, sturdy cleats secure cupola to roof.

Built to Last

- ▶ Sturdy construction
- ▶ No exposed wood surfaces
- ▶ Screened to keep pests and debris out

Samples of Custom-design Cupolas

All-copper

Huge red cupola made of painted steel

Innovative 3-Part Design

1 ROOF SECTION

Elegant standard copper-clad roof caps off the cupola. Clear-coat, bronze, or green patina finish can be applied. Choose from hip (shown), pagoda, or bell shape. Roof can also be clad in same material as rest of cupola. Weather vane mount is built in.

2 LOUVERED OR WINDOWED SECTION

Louvered midsection (shown) provides ventilation for attic. Screened to keep pests and debris out. Optional light kit illuminates louvers from within at night for a distinctive look. Or choose windowed midsection for a nonventing, decorative cupola that stands out day and night.

3 BASE SECTION

Cupola ships with the notch for your roof pitch already cut out. Sturdy built-in wood cleats (standard) secure the cupola to roof. Standard cladding for midsection and base section is coated aluminum, available in over 400 colors at no additional charge. Two-tone effects are also available at no extra charge. Other material choices include copper, galvanized or painted steel, and Kynar finish.

OPTIONAL CURBING

Convenient optional curbing (additional charge) enables flashing to be tucked inside the cupola for a clean and completely watertight installation. Highly recommended for tile roofs, reroofing, and new construction. Builders love it!

lighthouse weather vane

Louvered Cupolas

STANDARD MODELS

Our louvered cupolas combine functionality with elegance. They allow your roof to breathe, reducing heating costs in the winter and cooling costs in the summer, while adding a distinctive touch of class to the roofline. Choose from square, hexagonal, or octagonal base, and hip, pagoda, or bell roof. Standard models feature white base and middle section with copper roof, but they can be built in the color or finish of your choice (even two-tone) at no additional charge. Weather vanes are optional (but recommended) and cost extra.

For a venting cupola that stands out day and night, order our optional light kit.

Windowed Cupolas

STANDARD MODELS

By day, our innovative windowed cupolas add an attractive accent. By night, they light up the sky like a miniature lighthouse. These conversation pieces are strictly ornamental; they do not vent. Choose from square, hexagonal, or octagonal base, and hip, pagoda, or bell roof. Standard models feature white base and middle section with copper roof, but they can be built in the color or finish of your choice (even two-tone) at no additional charge. Obscure or specialty glass is available (extra charge). Weather vanes are optional (but recommended) and cost extra.

Setting the Standards in Maintenance-free Cupolas

At New Concept Louvers

we always strive to give you, our valued customer, exactly what you want. You pick the style, the color, the size you want, and we'll build the cupola and ship it to you, all ready for installation.

Painting Is a Thing of the Past

Most ready-made and build-from-a-kit cupolas are made of wood that needs to be painted when you first install the cupola and frequently thereafter. Ours, on the other hand, are made of wood wrapped in PVC-coated aluminum, so they never need painting. Even if you want the base and louvered section of your cupola to be some other color than the standard white, you still never need to paint the cupola, because you can choose from over 400 colors of coated aluminum! And the roofs of our cupolas are clad in copper, which also requires no painting.

Easy to Install

A cupola can be quite heavy, making it very difficult to hoist onto the roof. That's why we build our cupolas in three easy-to-assemble sections, so you don't have to haul so much weight all at once. Our innovative three-section design also makes it easier to attach the cupola to your roof. We even cut the notch in the base for you, to accommodate the pitch of the roof, so you don't have to!

Built to Last

Cupolas are exposed to extreme fluctuations in temperature and humidity, so the wood tends to warp and decay quickly. The same aluminum cladding that saves you the trouble of painting our cupolas also protects them, keeping them looking attractive year after year, despite the ravages of the weather. And unlike some other ready-made cupolas on the market, ours are sturdily built, with handy cleats that firmly secure the cupola to your roof to withstand the raging winds.

Functional Beauty

Our attractive louvered cupolas breathe new life into boring roof lines. By allowing the attic to breathe, they cut cooling costs in the summer, reduce moisture buildup in the winter, and help to extend the life of your roof. Top your cupola off with one of our charming weather vanes, and you'll have a real eye catcher that you and your neighbors will enjoy for years to come!

Easy to Order

Ordering one of our standard cupolas is a cinch. Just call us and tell us the model number of the cupola you would like and the pitch of your roof. If you would also like to order one of our weather vanes, tell us which style you want. We also offer custom-design cupolas made to your specifications. Call for details. All cupolas are carefully packed and shipped in sturdy wood crates to prevent damage in transit.

"Just want you to know that our cupola is installed and working GREAT! We are pleased with its appearance and how well it is built. We have had several people who are now interested in how we got it, and where. . . . Thank you so much for the quality you have installed in your products."

Brent and Trudy Monsma
Cave Junction, Oregon

"Before discovering New Concept, I ordered a cupola from another company and was very disappointed when it arrived. Not only was it shipped in a cardboard box, it was damaged beyond use. My cupola from New Concept was shipped in a plywood crate, came exactly as was promised, and was cut to the proper pitch. . . . Thanks, New Concept!"

Bob VanKerrebroeck
Geneseo, Illinois

"As the Managing Director of various family enterprises, I am faced with the task of overseeing many projects and making sure my team has the right tools for making decisions that add value. This has truly been the case with New Concept. The professional and warm, courteous assistance that we get from your team has made the difference. We can buy products anywhere, but the detailed expertise, follow-up, and quality customer care are what bring us back."
